Larry – thanks for the voice mail yesterday and for the quick, helpful review you and your staff gave to EPA’s draft response letter to the state. I much appreciated it – and we are looking forward to having Dee Allen and Kristen Hanson here later this week. I will try to stop by before the start of the meeting to introduce myself and say hello. Thanks again, Ignacio

Subject: RE: Tower Standard Letter from Wisconsin DNR

Darsi,

Attached is EPA's response to your February 28th letter regarding the Tower Standard Site. We believe that re-establishing effective communication between the three governments involved at the site is critical and suggest that EPA, LDF and WDNR staff meet soon with a facilitator. As the letter indicates, EPA and LDF have made recent progress on many of the same technical issues that WDNR identified in its letter - and a logical next step would be for all governments involved to meet. I anticipate that we will be reaching out to your staff soon with more details on planning that meeting. My hope is that we can then establish regular, productive communication between staff of the three governments – while being mindful of the timing constraints.

Please feel free to contact me directly if you have any questions or concerns.

Ignacio

Importance: High

Ignacio and Mike:

Please find attached to this email a letter from the Wisconsin Department of Natural Resources to you regarding the Tower Standard leaking underground storage tank site in Wisconsin. We would like to respectfully thank EPA for their help and efforts to date on this project. This letter summarizes the state's path forward on this site. We will continue to work with you and the Tribe to solicit and understand your comments and concerns. However, we do have an agreed upon schedule to meet and the DNR is going to be respectful of the PECFA deadline in order to effectively use the state funds available for this site.

Please feel free to call me if you have questions.

We are committed to service excellence.
